Michael V. Drake, M.D.
President of the University of California
1111 Franklin Street
Oakland, CA 94607

Dear Dr. Drake,

This correspondence is to be read in combination with the enclosed correspondence to the Nobel Foundation.

Thank you for your distinguished leadership in Academia. Enclosed is your copy of **DECODING ELON MUSK'S SECRET MASTER PLANS: Why Electric Vehicles and Solar Are A Winning Financial Strategy.**

DECODING ELON MUSK'S SECRET MASTER PLANS unlocks a new energy paradigm and addresses multiple misnomers regarding sustainable energy. This new energy paradigm: Trinity – leverages energy symbiotics and energy independence that encompasses both global transportation and consumer electricity energy dynamics.

Your efforts in formulating sustainability solutions have not gone unnoticed. You, as well as other colleagues across numerous Universities have been selected based on your subject matter expert knowledge in addressing, leading by example, and paving the way forward in teaching and implementing sustainable environmental solutions.

The industrial revolution periods were followed by the current technological revolution. We are entering a new revolution period which I have coined the Golden Age of Trinity. Advancing Trinity will exponentially advance the elimination of CO₂ emissions.

The contents within **DECODING ELON MUSK'S SECRET MASTER PLANS** qualify my pursuits of a new Nobel field in the area of **EARTH AND ENVIRONMENTAL SCIENCES**. It is my firm belief that the subject matter material put forth, with an emphasis to the specific chapters on ELON MUSK'S IMMORTAL MAGNUM OPUS and CONCLUSION warrants consideration of Elon Musk and TESLA for the nomination as Nobel Prize Laureates should this new Nobel field recommendation be granted.

I need your help. I am only one Leader. However, like all Leaders, I need the help of as many other Leaders to make the biggest impact as quickly as possible to reduce CO₂ emissions. I am hopeful that you will consider the enclosed book itself or key subject matter as additive material to your school's academic curriculum in helping to advance sustainable energy exponentially.

An eco-friendly e-book is available for immediate download on BARNES AND NOBLE, APPLE BOOKS, and GOOGLE PLAY BOOKS to discuss and share with others on your Leadership Committees. Alternatively, a hard copy can be purchased online through BARNESANDNOBLE.COM (preferred option due to utilization of lower weight paper stock and better color image rendering) or AMAZON.COM.

The future of Humankind is predicated on maintaining a natural equilibrium with our surrounding environment. As both Leaders and Scholars in the world of Academia, you are well positioned in making a profound impact on guiding, educating, and inspiring both current and future generations of students. Your leadership, knowledge, and commitment in Academia is crucial in taking the lead to educate current and future generations in formulating and implementing sustainable environmental solutions that benefit Humankind, Nature, and Mother Earth.

I humbly thank you for both your time and consideration.

Neo Trinity
